Re: Expanded Site Inspection - Carstab Corporation (Morton International, Inc.)  
OHD 000724138

Dear Ms. Griffin:

As discussed in our telephone conversation on Thursday, September 4, all legal issues regarding access for the Expanded Site Inspection (ESI) at the Carstab Corporation site in Reading, Ohio appear to be resolved. U. S. Environmental Protection Agency (U.S. EPA) legal counsel has assured me that Morton International's counsel verbally consented to allow PRC and its subcontractors to access the site with their existing insurance coverage.

The site contact (Mr. Glenn Schaff) has confirmed that Monday, September 14 is an acceptable starting date for the monitoring well installation. (This was the earliest date that the drilling subcontractor could mobilize.) PRC anticipates completing the drilling and well development by Friday, September 18 and conducting the ground-water, soil, and sediment sampling the week of September 21.

Attached are a revised Sampling Plan (Table 1) and Sample Location Map (Figure 4) for the ESI Site Specific Implementation Plan (SSIP), originally submitted July 7, 1992. Also attached is an errata sheet modifying the text of the SSIP. The table, figure, and text have been modified to address comments submitted by OEPA on July 16, 1992 and to reflect changes recommended by U.S. EPA legal counsel. Although the Reading municipal well samples remain listed in the sampling plan, sampling of these wells was completed on July 22, 1992.

If you have any questions or comment regarding the Carstab ESI, please contact me at (513) 241-0149.

Sincerely,

A handwritten signature in dark ink, appearing to read "Guy D. Montfort".

Guy D. Montfort  
Geologist

ADDITIONAL  
COMMENTS:

- LETTER RE. LANDSTAR ESI

Jeanne - since we're doing a  
SAS, it may take a few  
extra days to line up labs.  
If so, sampling may actually  
be week of September 28.
